# **COLONNE DE DOUCHE BARRE D'APPUI**

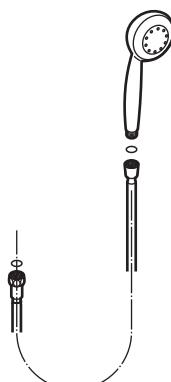

(COMPOSITION DU COLIS)

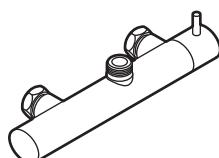

**1 x COLONNE DE DOUCHE**

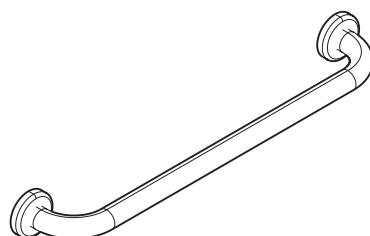

**1 x DOUCHE ZENITHALE**

**1 x DOUCHETTE A MAIN**

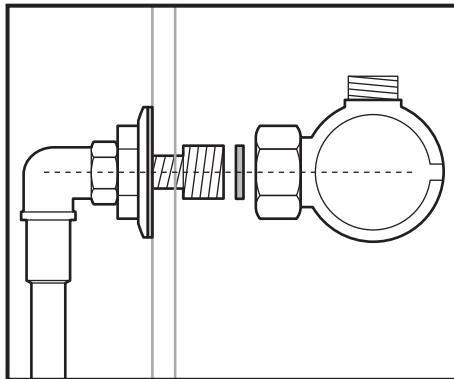

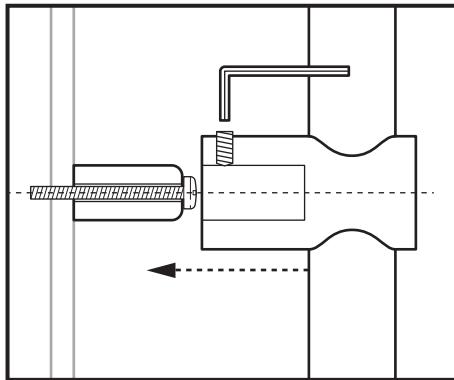

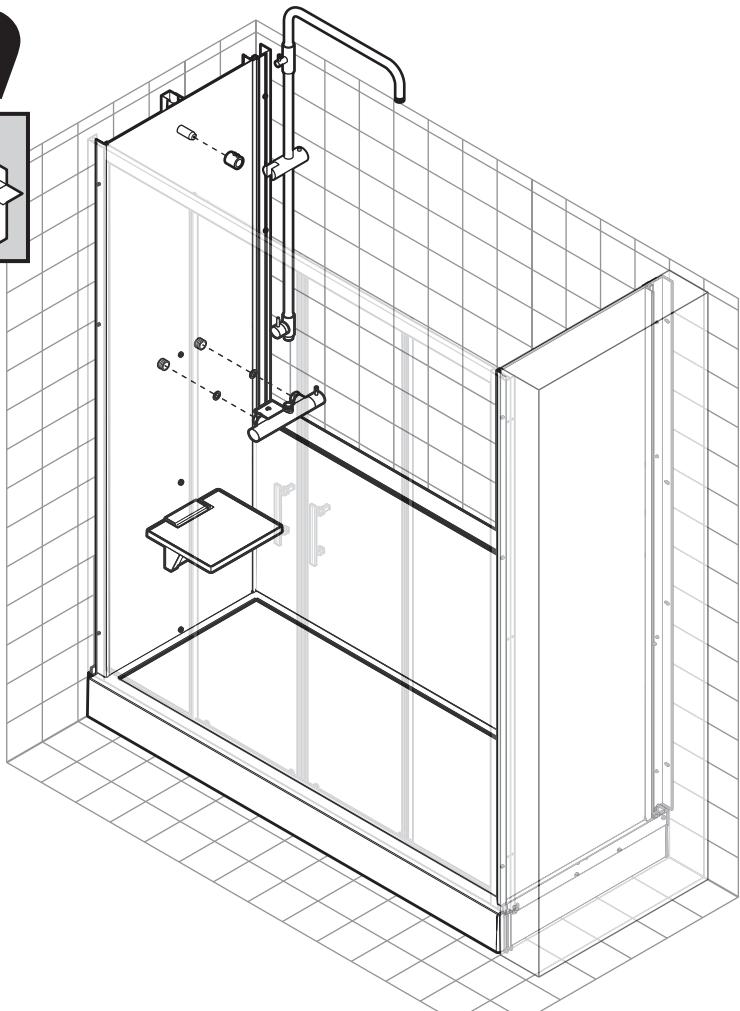

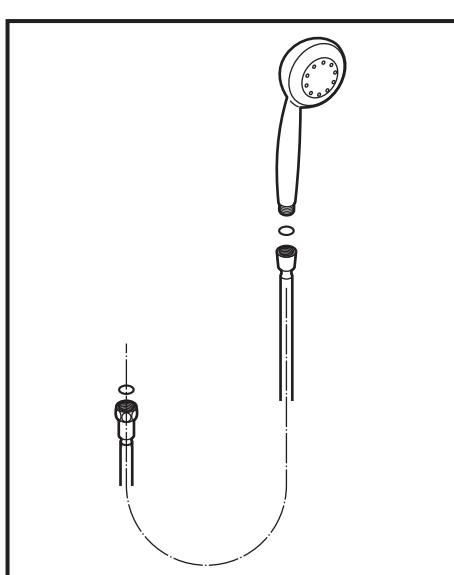

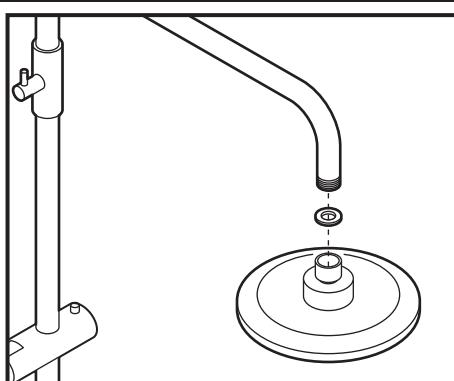

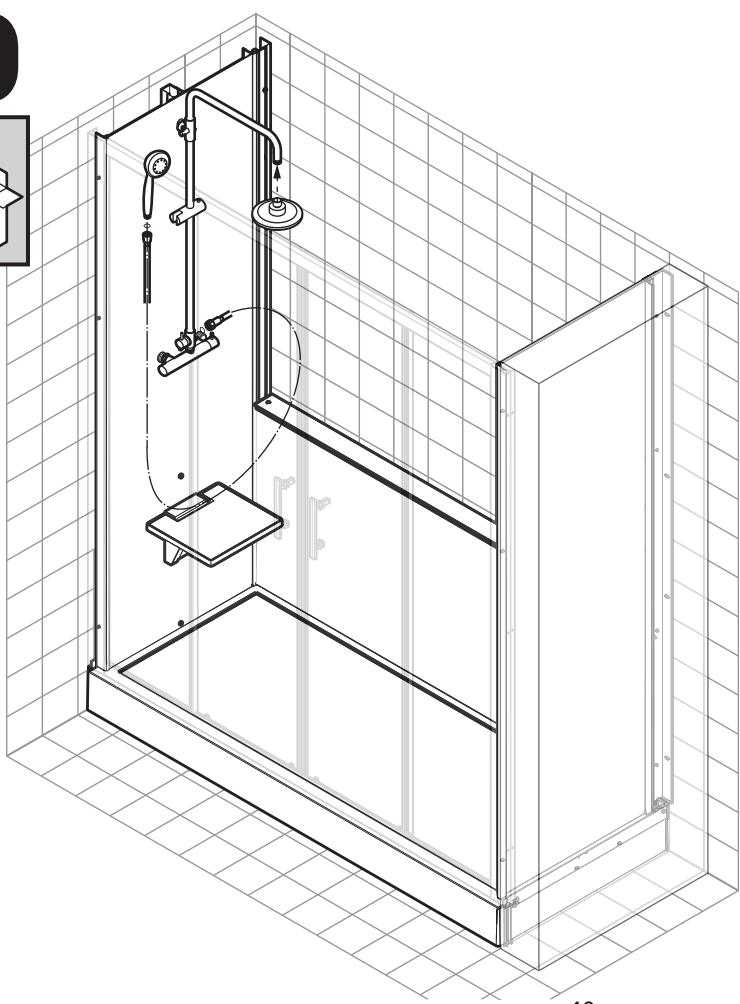

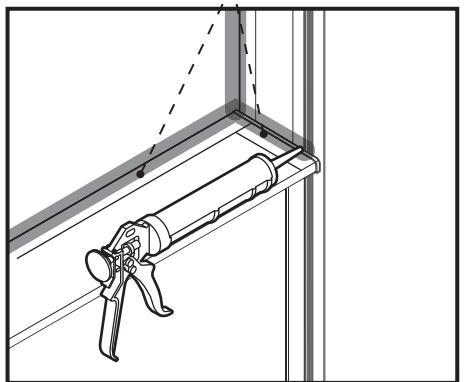

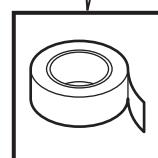

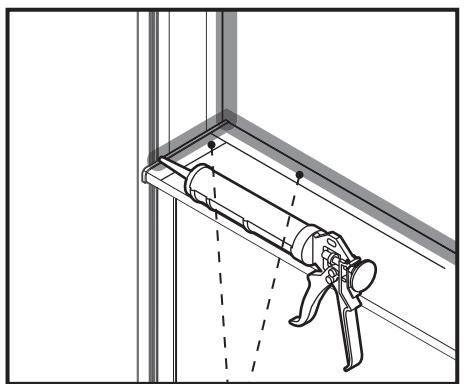

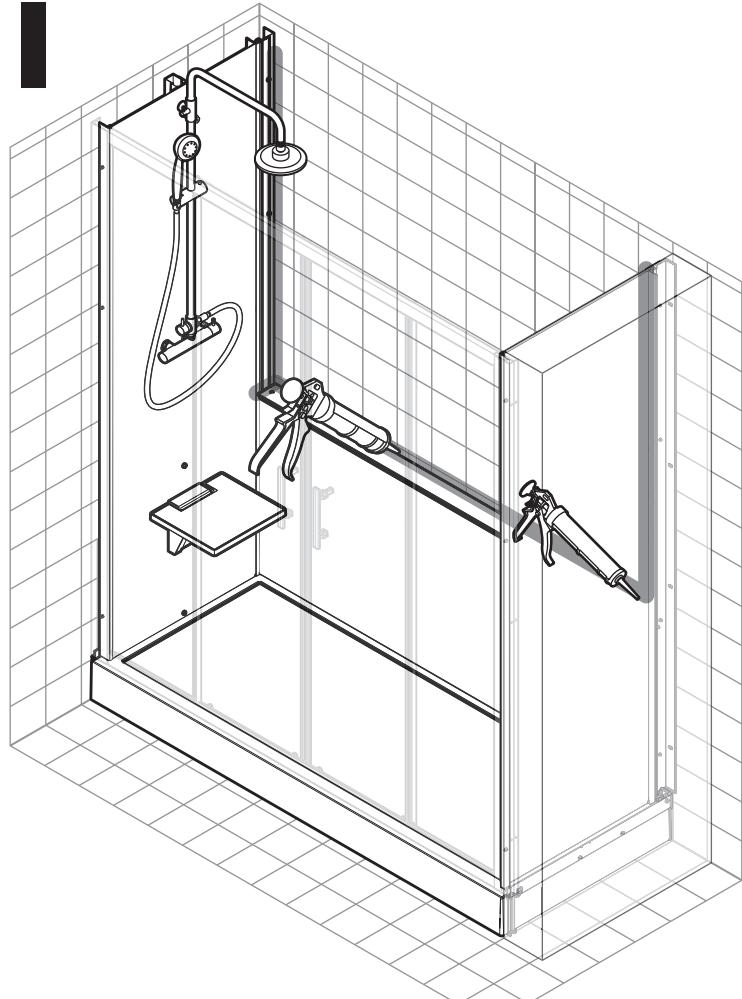

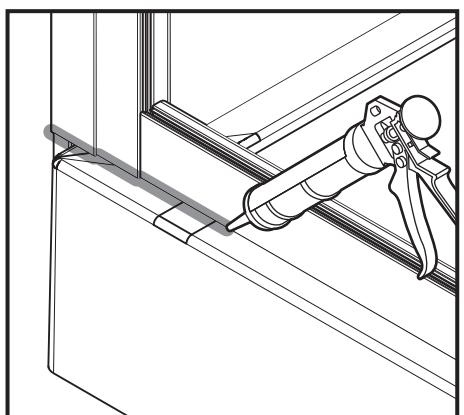

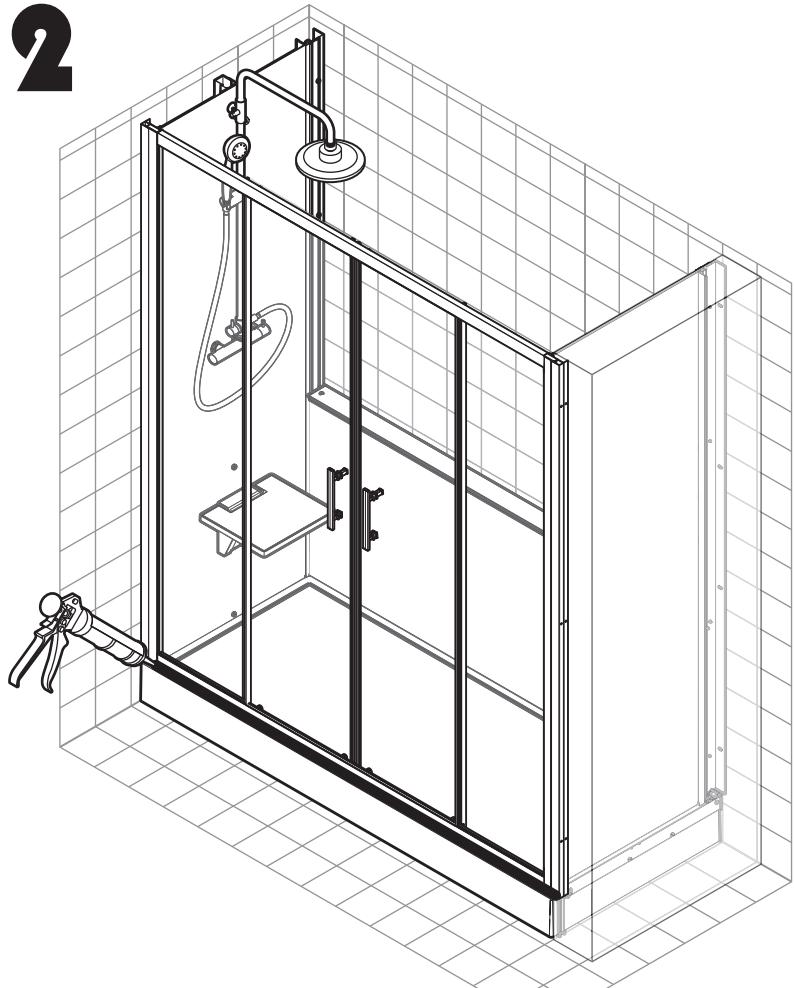

**1 x FLEXIBLE DE DOUCHE**

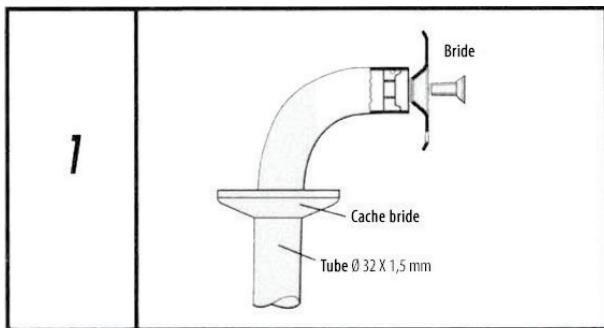

**1 x MITIGEUR MECANIQUE**

**1 x BARRE D'APPUI + VIS**

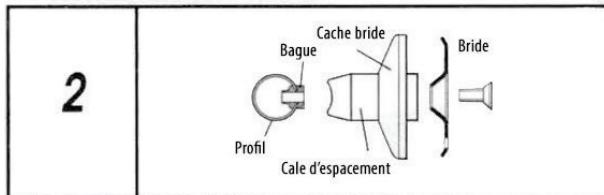

**49****5/5****50****5/5**

**51****52**

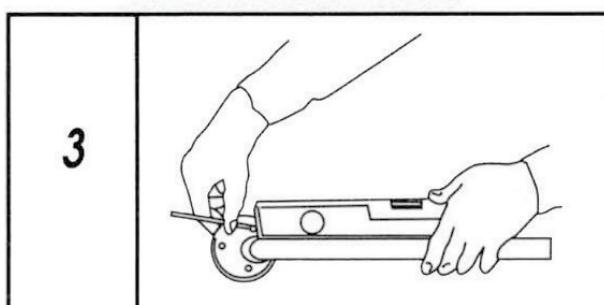

## BARRE D'APPUI - PHASE CROQUIS

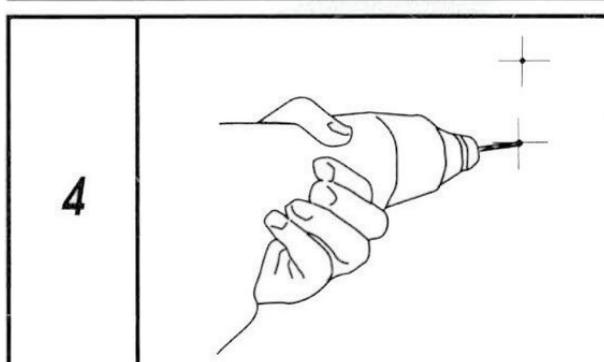

1 Insérer les caches brides sur la barre d'appui et fixer les brides de fixation au mur sur chaque extrémité (en utilisant les vis fournies dans le paquet).

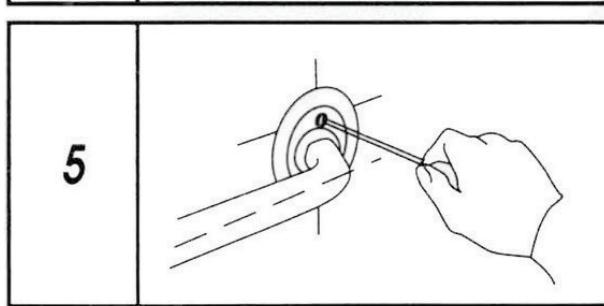

2 Faire glisser les cache brides sur les cales d'espacement (éventuellement présents dans le paquet, en fonction de l'article) et fixer ces derniers avec les brides aux relatives bagues.

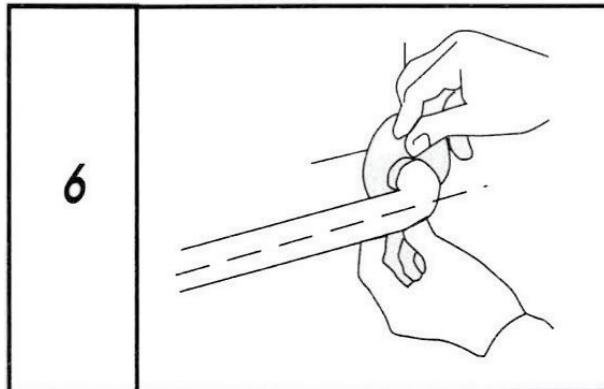

3 Positionner la barre près du mur et - en vérifiant la planéité - marquer la position des trous. N.B.: Les dimensions indiquées dans cette brochure sont à titre indicatif; pour obtenir un suivi parfait, effectuer ce qui est indiqué dans cette phase.

4 Effectuer avec précision les trous dans le mur et insérez les chevilles adéquates.

5 Bien serrer les vis de montage.

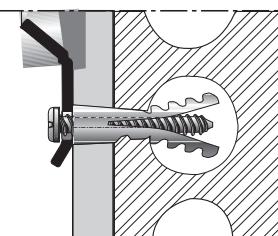

6 Positionner les caches brides et appuyer pour les fixer sur les brides.

**Attention!!! Le paquet ne contient pas les chevilles pour la fixation murale.**

N.B.: Afin de ne pas compromettre l'efficacité des traitements anticorrosion effectués sur nos produits, non vous prions de ne pas couper les profils. Nous vous rappelons que notre service technique est disponible pour donner tout renseignement sur les problèmes d'installation et pour la réalisation de solutions personnalisées.

## INDICATIONS POUR LE CHOIX DU TYPE DE FIXATION MURALE

**BRIQUES CREUSES**

**CHARACTERISTIQUES**

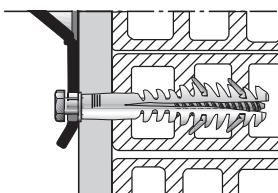

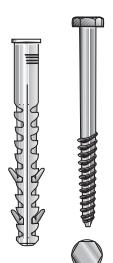

Cheville en nylon avec ailettes anti-rotation

**APPLICATION**

Indiqué pour les principaux matériaux de construction  
(FIXATION UNIVERSELLE)

UTILISER CHEVILLES Ø 8

Pour toutes les barres rabattables,  
UTILISER CHEVILLES Ø 12

**BRIQUES CREUSES**

**CHARACTERISTIQUES**

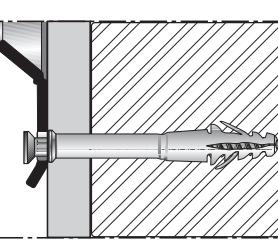

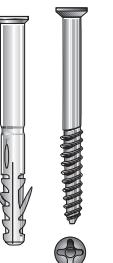

Cheville en nylon avec corps allongé et 4 ailettes

**APPLICATION**

Indiqué pour matériaux semi-pleins et légers

UTILISER CHEVILLES Ø 8

Pour toutes les barres rabattables, UTILISER CHEVILLES Ø 12

**MAÇONNERIE COMPACTE**

**CHARACTERISTIQUES**

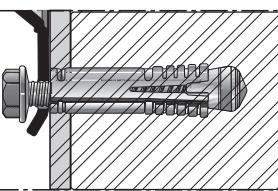

Cheville en nylon avec corps allongé.

**APPLICATION**

Indiqué pour murs pleins

UTILISER CHEVILLES Ø 8

Pour toutes les barres rabattables, UTILISER CHEVILLES Ø 12

**BETON OU BRIQUES PLEINES**

**CHARACTERISTIQUES**

Cheville en acier

**APPLICATION**

Indiqué pour béton et briques pleines

UTILISER CHEVILLES Ø 12 - M6

Pour toutes les barres rabattables, UTILISER CHEVILLES Ø 14 - M8

La gamme complète d'accessoires pour la sécurité dans la salle de bains est caractérisée par une extrême simplicité d'installation, une opération entièrement intuitive qui ne nécessite pas d'outils ou d'instruments spéciaux.

Afin de ne pas affecter sérieusement la fonctionnalité et l'efficacité des supports, conçus et construits pour supporter facilement le poids d'une personne, une attention particulière doit être accordée au choix du type de fixation en fonction du type de mur sur lequel elle devra opérer. Étant donné que les chevilles devront être logées dans un mur de bonne résistance, nous vous montrons ici à côté quelques exemples d'installation, accompagnés par de simples propositions pour le choix du type correct de fixation murale.

N'étant pas en mesure de vérifier l'état des murs et les procédures utilisées, nous déclinons toute responsabilité pour les installations défectueuses.

N.B.: Lorsque vous travaillez sur des murs non-compacts, nous vous recommandons d'utiliser au moins un ancrage chimique (Ø12 - M6) pour chaque bride de fixation.

Pour toutes les barres d'appui rabattables, utiliser de cheville de Ø16 - M8.
